

## IN THE CLAIMS

### Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application.

### Listing of Claims:

1. (Original) An arrangement for arresting a portable object, such as a desk computer, against a stationary object by looping around the stationary object one end of a cable, the other end thereof being associated with a key-operated locking device, the arrangement comprises:
  - a block-like cable-shoe body;
  - an oblong circular cavity formed in the body with an undercut portion extending along about 180° of one side thereof;
  - a ribbed attachment member, adapted to be inserted into the cavity and shifted into engagement with the undercut portion, and then locked thereinside by the key-operated device;
  - and the portable object being provided with said ribbed attachment member affixed to a side wall thereof.
2. (Original) The arrangement as claimed in claim 1 wherein the key-operated device is of the push-in type.
3. (Original) The arrangement as claimed in claim 2 wherein the ribbed member is circular and having a circular rib extending therearound fitting into said undercut portion.

4. (Original) The arrangement as claimed in claim 3 wherein the ribbed member forms the outer part of a rotatable hook-type computer door locking device.

5. (Original) The arrangement as claimed in claim 4 wherein the hook-type locking device is operable by a push-in locking device.

6. (Withdrawn) The arrangement as claimed in claim 3 wherein the ribbed member forms the outer part of a block-shaped body having a slot into which a pair of padlock lockable ears are insertable, a push-in type locking device is provided so that upon actuation thereof the ears become engaged by the operator pin of the push-in type locking device.

7. (Withdrawn) The arrangement as claimed in claim 3 wherein the ribbed member forms the outer part of a screw operated spreadable tongs device adapted to be locked against a standard dedicated slot formed at a wall of said portable object.

8. (Withdrawn) The arrangement as claimed in claim 3 wherein the ribbed member is attachable to a wall of said portable object by an adhesive patch.

9. (Withdrawn) The arrangement as claimed in claim 1 wherein the cable-shoe body is formed with a slot traversing said cavity for enabling a cable of additional equipment to pass therethrough and become secured to the portable object upon locking the cable-shoe thereagainst.
